New York Times. If it were quite sure that Mr. Sullivan and Mr. Ryan would kill one another in their approaching prize-fight there would be some reason to forgive any omission on the part of the authorities to interfere with such a beneficent affair. The probabilities are, however, that both brutes will survive, and that Mr. Sullivan will for some years to come pursue his edifying career as a brawling drunkard and beater of women. Indeed, the fight may not be meant to take place, for if each brute is afraid of the other one, as is probably the case, they will merely pretend to make preparations for a fight in order to secure a large amount of free advertising

President Cleveland has very long busiress hours. He is in his office ready to see cople at 8:45. He is there, with the exception of his going to lunch, until 6 o'clock, when he dines. His dinner is not a long affair, not three or four hours like the Arthur dinners. By 7:30 the President is back in his office and remains there until nearly midnight. I saw him last night a little before 11. He did not look at all fatigued, although it was at the close of a very long day. He said he had hardly been out of the White House since he came to Washington, a week ago yesterday. He hopes to make arrangements for out-door exercise within a few days. He is very much surprised at the comparative freedom he enjoys here from the presture of office-seekers. He had anticipated a great deal of discomfort from this source alone. He finds, however, that he not nearly as much annoved by personal requests in Washington as he was in Albany. He is very much interested in getting the departments upon a first-class business basis. He is now devoting his entire time to the consideration of methods and men calcu ated to secure the best results in this di-
